LAX

Narrative:
The LAX is known for being one of the busiest airports in the country with about 85 million passagers a year. And while it is known for being an international success the LAX also has some domestic milestones. The largest one being that it is the largest employer of Black people in Los Angeles County. It employs many of the residents in the communities of interest that were identified through our virtual workshop gatherings.

Key Unifying Trends:
Many people in South L.A. find employment at the LAX for several reasons: the accessibility of reaching the LAX (Metro lines) as well as it's proximity to South L.A. and Inglewood.

District Preferences:
Folks would like to see LAX drawn into their district as it has become a part of their community and everyday lives.
