Subject: redistricting

Attention: Curt Pedersen< Chair Boundary Review Committee

I am writing to you as a member of the Central/Westside Service Council for Metro, and as a private citizen living in the third district. I believe that the third district is not just a piece of geography containing certain number of citizens, but rather an amalgamation of people that share not only common land but also share common problems, cultures, and have over the years formed many lines of communication, and association, in dealing the issues that face them jointly. Specifically with respect to transportation; the various areas that form the northwestern portion of LA County, have in the past worked very hard together to make public transportation, better and more relevant to the people. These relationships have taken years to forge and become effective. I believe the same to be true in urban planning, in dealing with social issues and in many other areas of concern.

The "Greater Westside" is known as a "unit" important to Southern California, and well known as such to the country. I strongly believe that the third district should stay intact and hope that the commission will see the wisdom in so doing. Thankyou for your consideration,
Sincerely,

Glenn Rosten
