Subject: Re-districting

It has come to my attention that there is a proposal at County level to move all or part of North Long Beach to another county district. This would put us in a totally different district and separate us from the rest of the City of Long Beach. Our ability to influence our county supervisor will be greatly diluted. I believe we would become even more of the "stepchild" and our needs ignored.

North Long Beach's State and Federal representation is already divided. At state level we are represented by a different assembly member and Senator than the rest of the City. At federal level we are represented by two different Congresswomen.

At County level it is important that North Long Beach remain a part of the City of Long Beach, since our issues and needs are similar with the rest of the City.
