4	Elida Mendez	Favor	<p>Green Meadows Community located in District 9 and part of District 8. Boundaries from Manchester to 98th st. and from Central to the Broadway. The reason that this community must be redistricting is because when asking for city services nobody wants to take responsibility over this community. The Boundary between the Districts is Wall st.</p> <p>My recommendation is to make the community only District 9 from the Boundaries mention before. This redistricting Boundaries will make the Green Meadows Community to be better represented. This community must be represented for one councilmember to avoid confusion and conflicts. Also give this area to the District 9 neighborhood council that is closer to the community.</p>	8/31/21	n/a
4	Henry Fung	Other	<p>The redistricting software needs to have an ability to select the entirety of a city or census designated place at once. Currently the defined geographies are block, block group, tract, and county. This makes it difficult for someone to build a supervisorial district while keeping cities whole, as they generally are whole today (with the exception of Los Angeles due to its size). Thank you.</p>	9/1/21	n/a
