LOS ANGELES COUNTY
REDISTRICTING 2021

The County's CSA project was developed to provide a common geographic boundary for reporting departmental statistics for unincorporated areas and cities. The City of Los Angeles neighborhoods come from the City of Los Angeles Bureau of Engineering. CSAs differ from the more informal "Community" geographies because:

- They represent geographies comprised of Census block groups split by cities.
- They must cover the entire unincorporated and incorporated areas of Los Angeles County.
- There can be no holes or overlapping areas.

The CSAs originally were created using Census Block Groups split by cities (e.g. "Split Block Groups") as a geographic building block. These boundaries are subsequently updated as needed based on city's annexation/deannexation records. In the City of Los Angeles, the LA City Neighborhood file was overlaid on the Block Groups and boundaries assigned using the centroid of the block group; therefore, while the names of the CSAs in LA City match the neighborhood file, the boundaries are not the same. Additionally, CSAs are named according to the following recommended naming conventions:

- All names will be assumed to begin with "Unincorporated" (e.g., Unincorporated El Camino Village) for the unincorporated areas. They will not be part of the Statistical Geography Name (so the name of the Statistical Area would be "El Camino Village").
- Names will not contain "Island" – beginning each name with "Unincorporated" will distinguish an area from any surrounding cities. There may be one or more exceptions for certain small areas (e.g., "Bandini Islands").
- A forward slash implies an undetermined boundary between two areas within a statistical geography (e.g., Westfield/Academy Hills or View Park/Windsor Hills).
- Certain established names may include hyphens (e.g., Florence-Firestone).
- Aliases may be defined in parentheses (e.g., Unincorporated Long Beach (Bonner/Carson Park)).
