

Please post this email and its attachments for consideration under the discussion of Hypotheses on tomorrow's agenda.

Tomorrow's meeting is a special meeting, and there is still plenty of time to make the 24-hour (6:30pm tonight) posting/notice deadline.

Also, please call the "Three Stripes" Hypothesis a Team 3 Hypothesis, not a Commissioner Holtzman Hypo. - dah

Gayla and Thai -

For a little more detail on Hypotheses I've drawn, please join the group I'm calling "DHoltzman&ARCBridge&KH" (I've invited you; Priti has already joined).

The plan Dan mentioned is now called "**ThreeStripesKeepingSOIsWhole**" [SOIs stands for Spheres of Influence].

The other plans I've shared with the group (as of now) are:

1. **ThreeStripesKeepingCitiesWhole**: Drawn tonight to respond to last night's concern about being stuck in the big unincorporated "hole" in the incorporated city of Palmdale. I had to puncture the ring around the hole but went through an apparently unpopulated area. The rest of the city is still intact, in one piece.

2. **Roughly the Valley and its Influence**: roughly the San Fernando Valley plus Malibu, which is coastal but claimed by commenters and organizations as part of a Las Virgenes COI.

3. **Roughly the Valley Not Malibu**: Roughly the Valley. :-)

Hope these are useful. - d

p.s. I've attached (added to the attachments) Shapefiles and Google Earth files for the plans here, plus a map of Palmdale so you can see the hole.
