Introduction

Pursuant to Resolution No. 2021-04 adopted by the County of Los Angeles Citizens Redistricting Commission (CRC) on December 15, 2021, the Los Angeles County Registrar Recorder/County Clerk (RR/CC) was delegated with authority to make adjustments to parcels split across Los Angeles County (County) Supervisorial District lines in the 2021 Supervisorial Districts boundaries adopted by the CRC, and to report on the adjustments made. Specifically, Section 3 of Resolution No. 2021-04 provided as follows:

"Delegation of Authority. The Executive Director is authorized and directed to file the Redistricting Plan, including the GIS shapefile, with the Los Angeles County Registrar-Recorder. In the case of any parcels that are split across supervisorial district boundaries, the Los Angeles County Registrar-Recorder shall apply a uniform methodology to adjust the boundary line to a border of the parcel without materially affecting the population within each affected District. The Los Angeles County Registrar-Recorder shall report in writing to the Commission setting forth any such adjustments made."

Uniform Methodology

Based on the actual building footprint and utilizing aerial imagery, the RR/CC Geographic Information Systems (GIS) team adjusted the Supervisorial District boundaries in instances of split parcel as follows:

- 1- If the entire structure is in a single Supervisorial District, the entire parcel is adjusted to that Supervisorial District.
- 2- If the structure is divided between Supervisorial Districts, the percentage of parcel split is determined, and the smaller split portion (less than 50%) will be adjusted and placed together with the larger split portion (greater than 50%) in the Supervisorial District where the larger portion sits.

Note that the split parcel adjustments made are based on assessor parcel layer data as of December 16, 2021.

Based on the above-referenced uniform methodology, RR/CC identified and made adjustments to split parcels, as set forth below (see Split Parcel Table, Appendices A and C).

Considerations and Highlights

It should be noted that the geometry of the census blocks is not a perfect representation of city boundaries, street centerline, and natural boundaries (hill/channel). Therefore, when the intent of the CRC is to have specific Supervisorial Districts within specific city boundaries, the RRCC conformed the boundaries with the official city boundaries; same for street centerlines or natural boundaries using the latest available aerial imagery. Additionally, any modifications to the Assessor's parcel boundaries made after December 16, 2022 were not considered. A foot or less was the average adjustment.

An overwhelming majority of the adjustments were in the streets right of way or street centerlines, where no voter population numbers were materially affected.

The RR/CC GIS team would also like to highlight the following locations that were adjusted due to their relative size.

- 1- Two parks that were split between different County Supervisorial Districts:
 - a. Workman Mill Road Staging Area – This area was split between Supervisorial District 1 and Supervisorial District 4, and was adjusted to Supervisorial District 1 upon applying the uniform methodology set forth above.
 - b. Puente Hill Landfill Park – This area was split between Supervisorial District 1 and Supervisorial District 4, and was adjusted to Supervisorial District 1 upon applying the uniform methodology set forth above.
- 2- Atwater Village— a community determined by the CRC to be entirely within Supervisorial District 1, but one of its non-residential blocks was inadvertently included in Supervisorial District 5, and was adjusted to Supervisorial District 1.
- 3- An area between City of Los Angeles (City) and the County of Los Angeles in which the City's boundaries and County's parcel-based geographic boundaries for the area have slight differences, and the boundaries were conformed to the County's parcel-based boundaries (CRC's adopted Supervisorial District boundaries are based on census-data geography layered with City's boundaries).

All the above-mentioned locations are non-residential areas.

Comparison Tool

To compare the Supervisorial District boundaries before and after adjustments, the RR/CC GIS team is providing the CRC with a GIS application. Through this 2021 Los Angeles County Supervisorial District Comparison Web Application (Application), the CRC will be able to compare the pre-adjustment and post-adjustment boundaries and conduct address or parcel number (Assessor Identification Number (AIN)) searches for any areas of interest. The user can alter the visibility of any layer, switch the basemap's (background) imagery from streets to the most recent aerial imagery, access specific bookmarks, and compare the Supervisorial District layers for the RR/CC and CRC boundaries by swiping between them.

The link to the Application is as follows:

<https://lacounty.maps.arcgis.com/apps/webappviewer/index.html?id=2c727871ce0146cc9d1cd512ae015083>.

The Application consists of the following layers:

- 1- RR/CC Supervisorial Districts (2021)
- 2- CRC Supervisorial Districts (2021)
- 3- LA County Parcels
- 4- LA County City Boundaries
- 5- Redistricting Data Units (RDU)

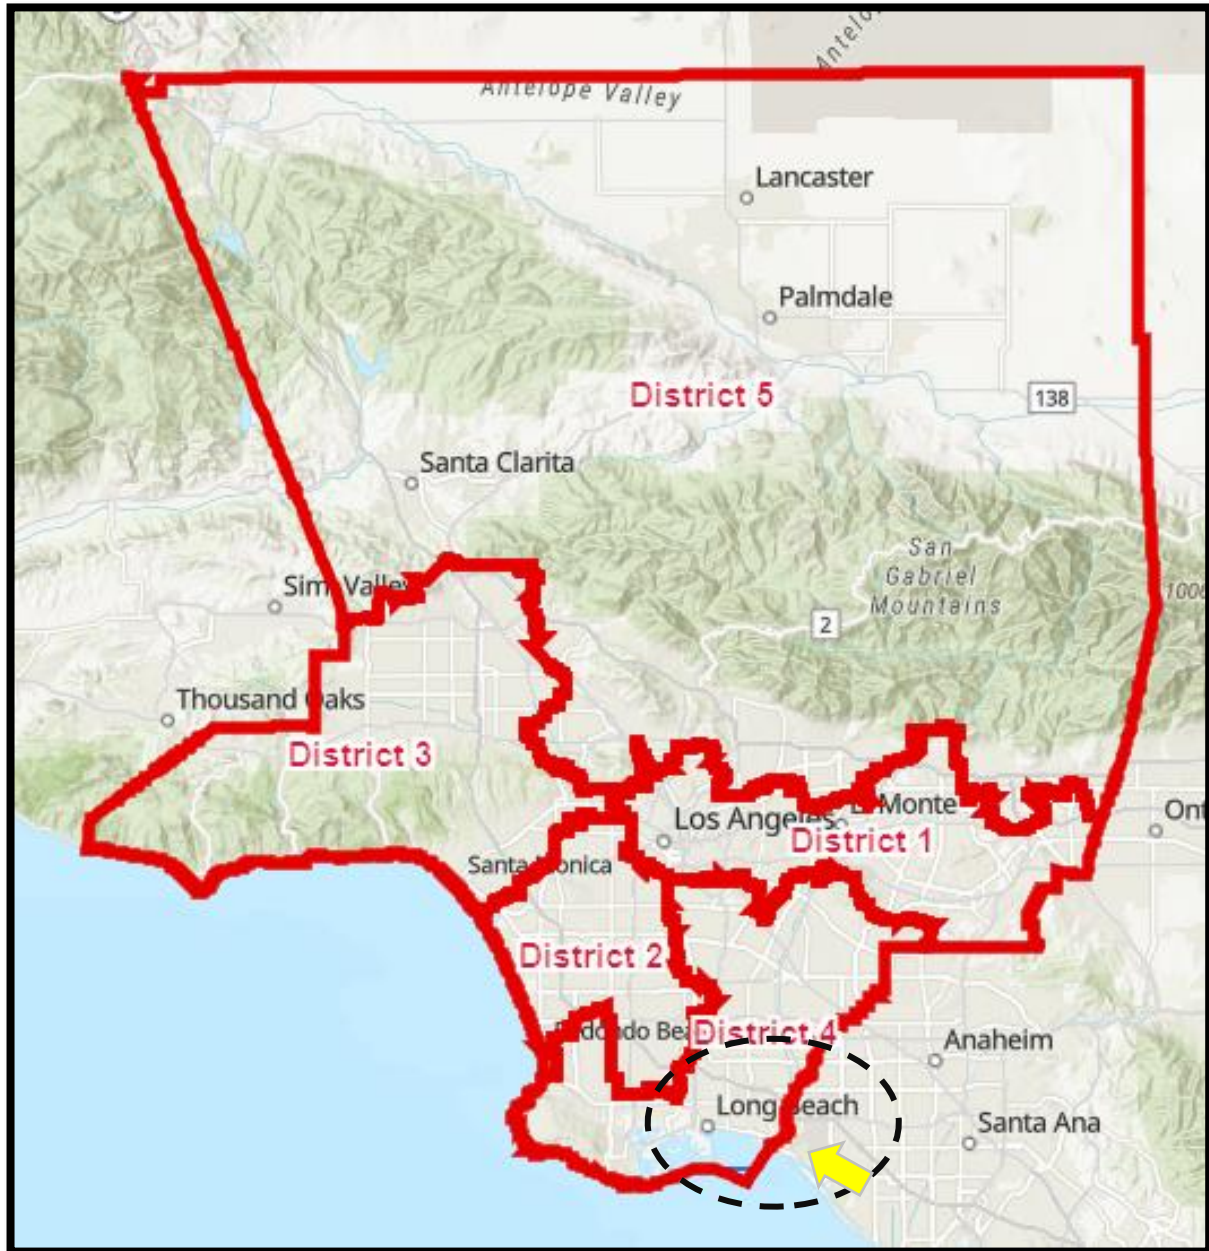

A User Guide for the Application can be accessed using the following link:

<https://www.lavote.gov/docs/rcc/election-info/supervisorial-districts-comparison-user-guide.pdf>

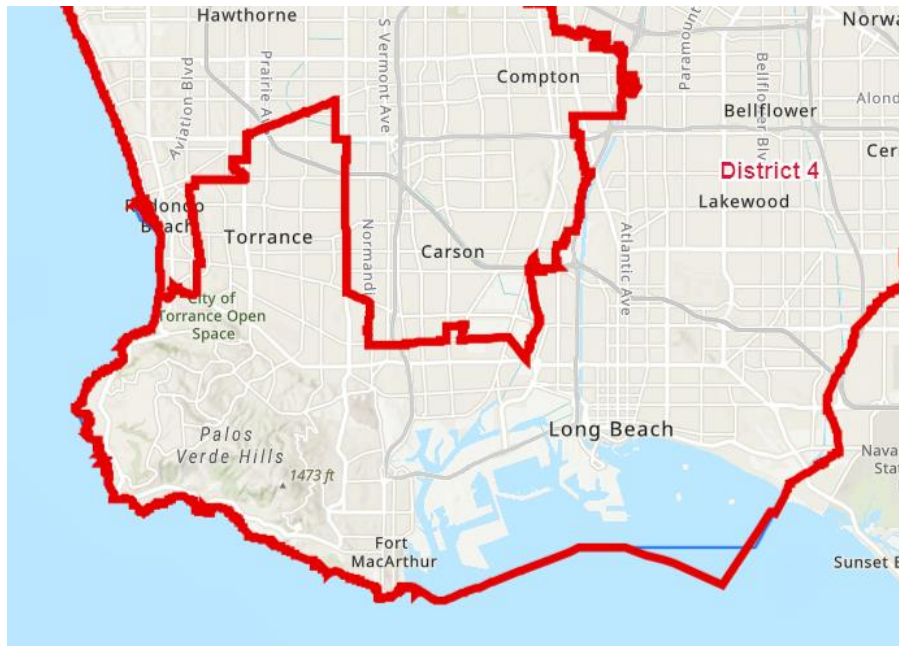

Users can refer to the bookmarks to view specific adjustments in various areas.

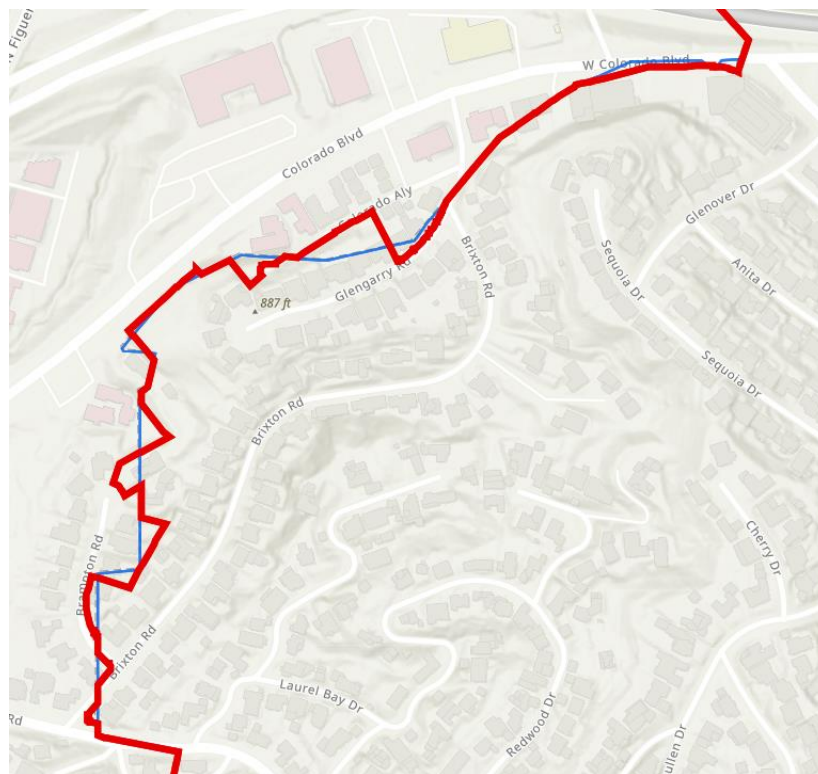

The following screenshot (Figure 1) shows, at a Countywide level, post-adjustment lines in red (on top) and pre-adjustment lines in blue. On this zoom level, the only difference is in the Pacific Ocean (City of Long Beach). *Please refer to the southern portion of the map image below.*

The following screenshot (Figure 2) shows a more zoomed-in view of the southern portion of the map in Figure 1.

The following screenshot (Figure 3) is another example illustrating the pre-adjustment boundaries (in blue) with the post-adjustment boundaries (in red) in the Pasadena area (see "Pasadena" bookmark on the map application).

Split Parcel Table

The Split Parcel Table (Appendix A) was created by comparison of the pre-adjustment and post-adjustment Supervisorial District boundaries at a scale of 1:5000, where 1 inch on the screen corresponds to roughly 400 feet, and 1/16" to approximately 25 feet.

The following elements are listed in the table:

- 1- Parcel Number (AIN)
- 2- Number of voters registered at each parcel
- 3- Issue
- 4- Resolution of the Issue

No voter population was materially affected by these adjustments. Most of the parcels (221) had zero voters, 70 parcels had a total of 296 voters.

Notes:

- 1- The voter count is based on the voter registrations as of June 2022. Population-based census data is not refined to parcel level. At the parcel level, the only data available is voter registration data.
- 2- Voter Count included in [Appendix A](#) reflects the number of voters registered at those parcels. There is no material change in population from one Supervisorial District to another.
- 3- The table is sorted ascendingly based on the voter count.
- 4- Each parcel included a minor split portion in a different district, usually in a right-of-way or a parking lot, accordingly the voters were unaffected, please refer to [Appendix B](#).
- 5- There are additional minor adjustments made at a sub foot level (i.e., less than one foot) to adjust split parcels that fall below the scale of 1:5000 and are not included in Appendix A. These additional adjustments were made on a scale of 1:10, primarily to align with the parcel boundaries, street centerlines or city boundaries. No voter population was affected in any of those sub foot adjustments. Please refer to [Appendix C](#).
- 6- There are 317 overlapping parcels that have the CRC boundaries split in a hilly area, their range is from AIN 2580018014 – AIN 2580018268 and AIN 2580019001 – AIN 2580019123. The overlapping of these parcels is believed to be caused by the real estate developer or assessor's decision to not divide the lot into separate parcels, and the overlapping parcels were split in a hilly area where there are no residential structures, see Appendix B, Figures 5 and 6 and "Overlapping Parcels" bookmark on the map application.

Appendix A – Split Parcel Table

503-609	2580019001 – 580019123	CRC line crossing SUP 3&5	Assigned to SUP 3

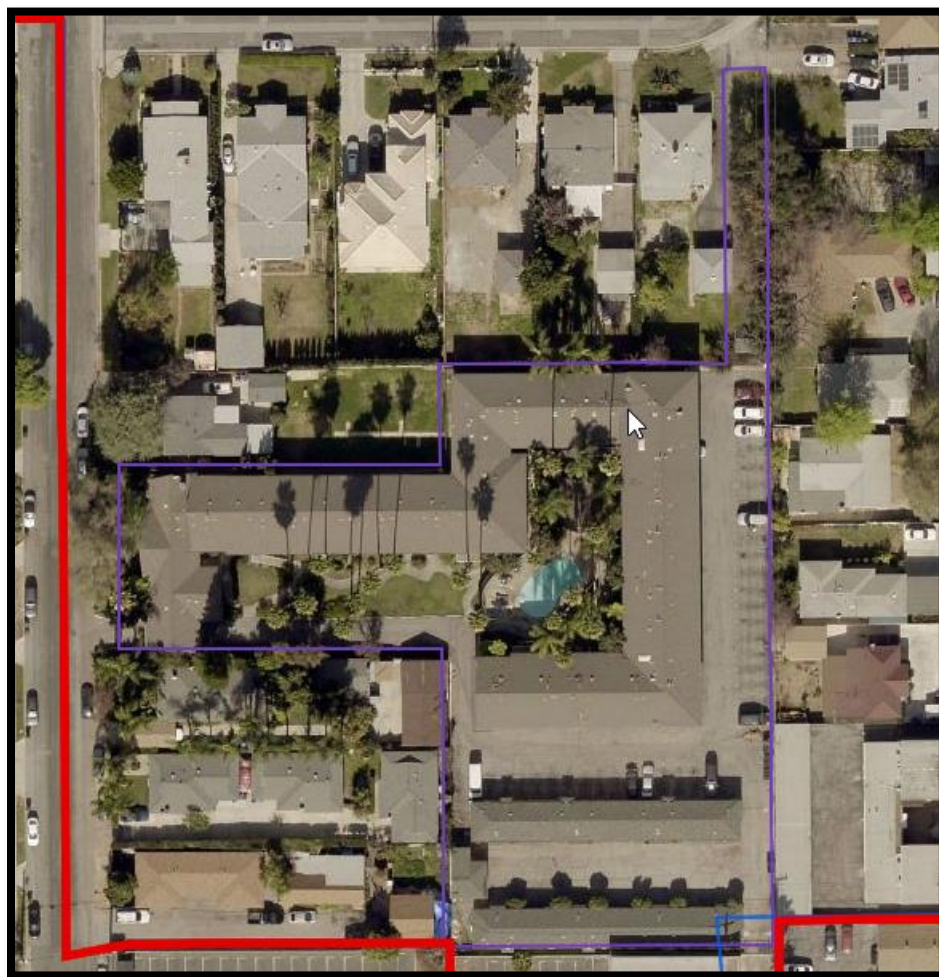

Appendix B – Parcel samples

Below are a few depictions and description of some of the parcels identified in the Split Parcel Table (Appendix A).

Parcel AIN 5387002023 from Appendix A, which has 41 voters registered at the entire parcel according to the voter registration database (the highest number of voters registered at a split parcel on Appendix A), is depicted in the screenshot below.

The CRC's pre-adjustment boundary is shown by the blue line (southeast corner of the map image below), the post-adjustment boundary by the red line, and the parcel boundary by the purple line. The aerial imagery shows that the blue (CRC) line is splitting the parcel in the southern eastern corner. The small, southeasterly part of the parcel was in Supervisorial District 1, whereas the majority of the parcel is in Supervisorial District 5. The split parcel was addressed by placing the entire parcel in Supervisorial District 5. No voter population was materially affected by the adjustment.

Figure 4

Figures 2 and 3 represent a group of 317 overlapping parcels in Districts 3 and 5, their range is from AIN 2580018014 to AIN 2580018268 and from AIN 2580019001 to AIN 2580019123. RRCC aligned the Supervisorial District boundaries with the parcel boundaries so that all the affected parcels are now in District 3. No voter population was materially affected with this adjustment.

Figure 5

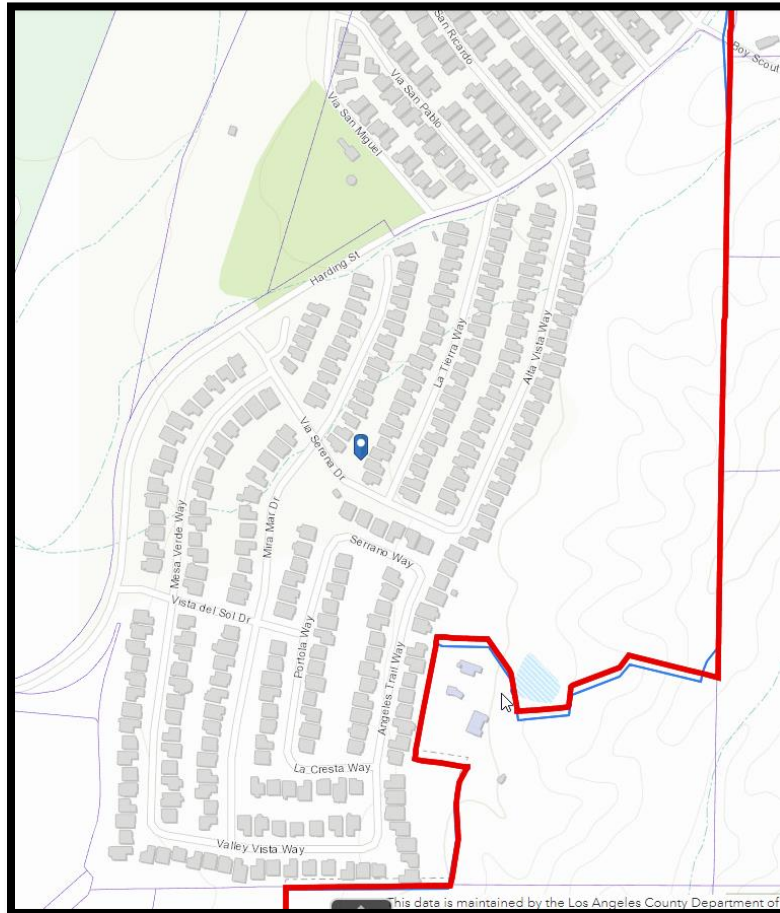

Figure 6

Appendix C – List of Parcels with minimal adjustments

This includes a list of the parcels where there were minimal adjustments (i.e., less than one foot). The list may include overlapping parcels. No voter population was materially affected with these adjustments.
